

floor-fastening plates

BFPK

for levelling elements LBE PH

floor-fastening plates BFPK for levelling elements LBE PH

These fastening plates are made of high-strength compound material, precision-milled to shape and equipped with elongated holes for ground dowels. Suitable to keep machines in place, where strong horizontal forces and the tendency to wander occurs. Installation is simple and can be applied even retroactively with already existing set-ups in combination with our levelling elements LBE PH.

Available in 3 sizes: floor-fastening plate BFPK 7 suitable for levelling elements LBE 7 PH (base diameter 76 mm), floor-fastening plate BFPK 10 suitable for levelling elements LBE 10 PH (base diameter 105 mm) and floor-fastening plate BFPK 13 suitable for levelling elements LBE 13 PH (base diameter 135 mm).

optional:

suitable bolt anchors for fastening in the ground (refer to the bottom of this document - to be ordered separately)

produkt highlights:

high-strength compound material
3 sizes available

elongated holes for bolt anchors
milled to precision

easy installation

applicable also retroactively with
already existing machine installations
